

Our mission: The reliability of your products.

Connect with Confidence.

Any given product is only as good as the individual parts that ensure that it functions as a whole. That is why you should put system development and cable assembly only in the safest hands. For several decades now, our medium-sized, German company has been supplying customised cable assemblies, system technology and a wealth of electromechanical construction elements that are both fully developed and of the highest product and machining quality. One way in which we ensure innovative and consistent product quality is by manufacturing our own customised and highly versatile solutions based on a certified quality process. In this way, we strengthen your customers' confidence in your products and brands.

Right by your side: From concept to series production.

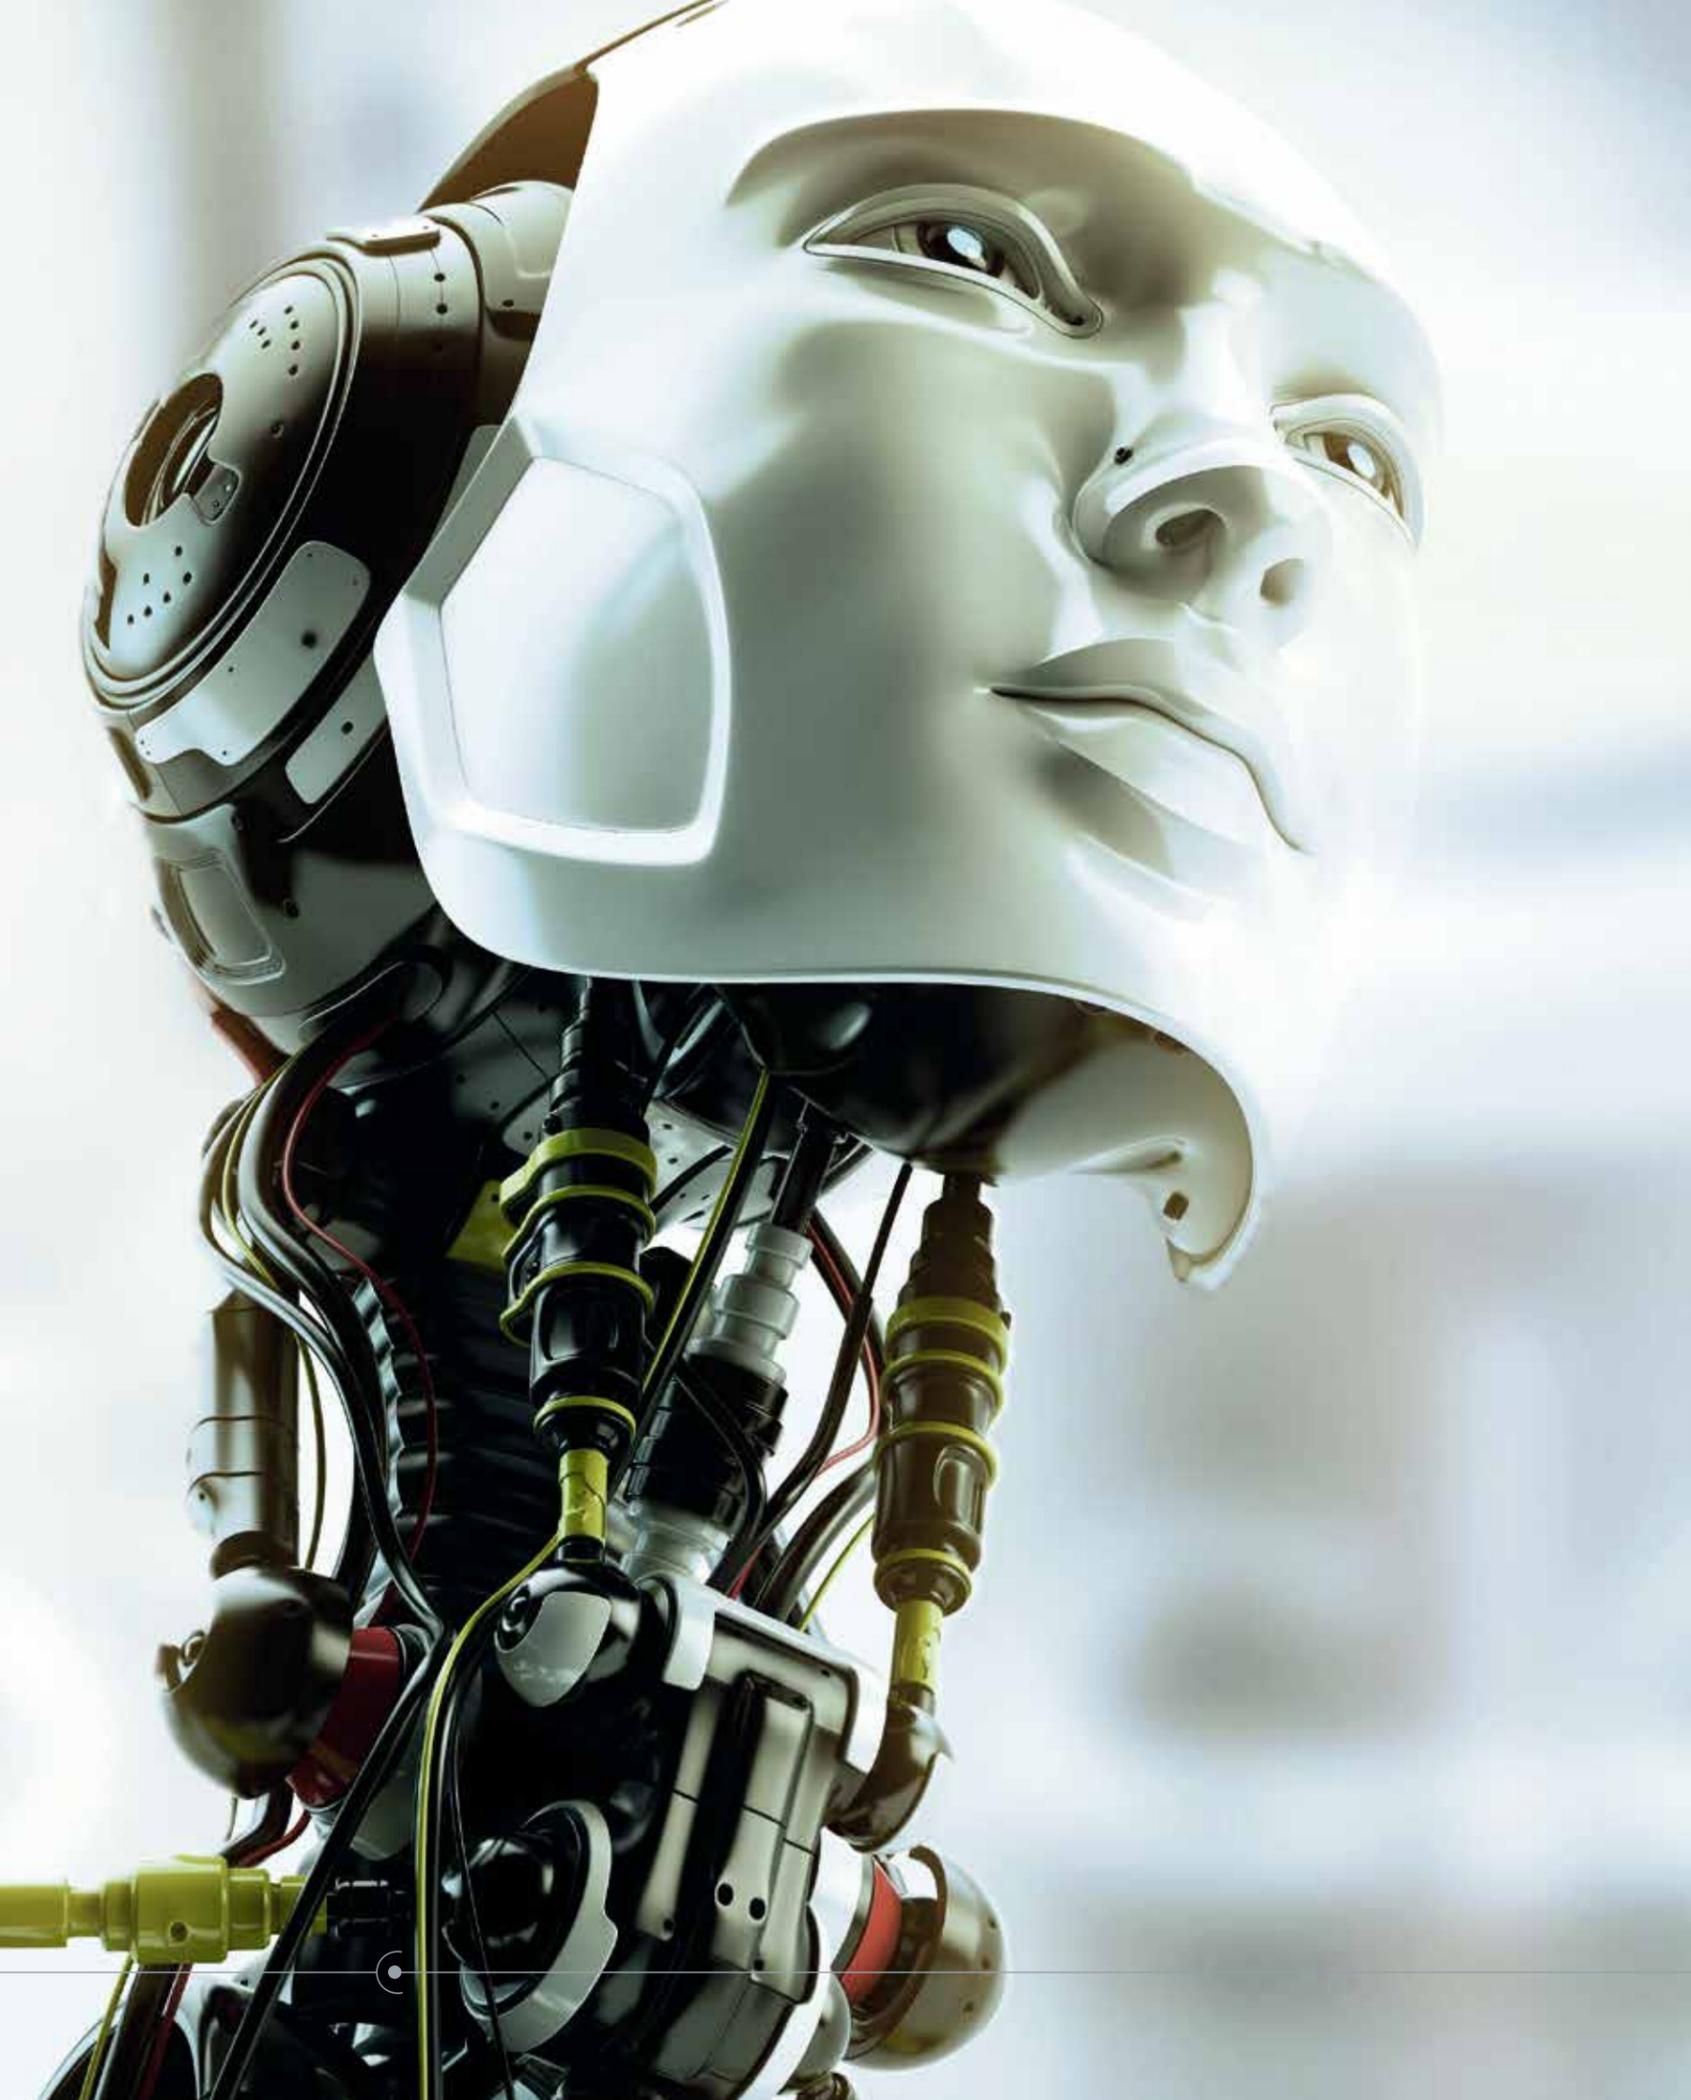

CiS offers solutions: Our service begins with a high-quality consultation.

To find the optimal solution for your product idea, our approach is to start from scratch. From the initial product development consultation and the development of drawings and parts lists right through to the risk analysis and testing of prototypes and, ultimately, series production, we will be right by your side until your successful production system is up and running. All the while, drawing on crystal-clear, easily comprehensible project planning. If you have any queries at any stage of the product development and manufacturing process, our CiS Engineering Team will be there to advise you.

- ANALYSIS OF THE CURRENT STATE
- DEVELOPMENT OF SOLUTIONS AT YOUR SITE
- TECHNICAL CONSULTATION
- PROJECT PLANNING
- RISK ANALYSIS
- PROCESS OPTIMISATION
- TCO OPTIMISATION
- SAMPLING
- SERIES PRODUCTION

connect with confidence.

Our challenge: To make your product idea a reality.

Research & development:
Our foundation for genuine product innovations.

Your idea is the starting point for the development of the optimal technical basis for your product – and that's not all: Based on your requirements, we are capable of developing an entire system. Our involvement in research projects enables us to successfully integrate new developments in the field of connection technology and sensor systems into your products. We will, of course, do this by using materials that meet your requirements. In this way, we can offer you real added value: by commissioning us as your experienced development partner, you will not only be securing additional innovative value, you will also be able to focus on your core competencies to a greater extent.

- RESEARCH AND DEVELOPMENT OF INNOVATIVE SENSOR SYSTEMS AND CONNECTION TECHNOLOGY
- CUSTOMISED PRODUCT DEVELOPMENT
- ORDER-RELATED PROJECT DEVELOPMENT

From a single source: Cable manufacture and system technology.

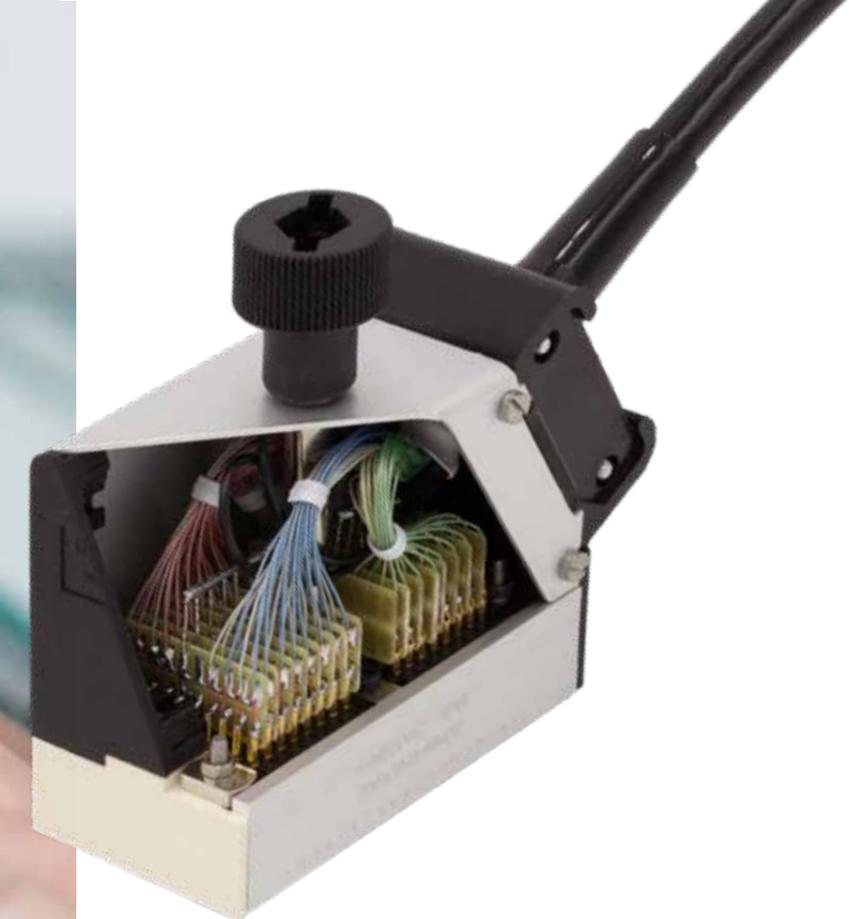

Assembly installation with tested functionality

At CiS, we do more than just take care of your specific cable manufacturing requirements, we also install entire assemblies, making your production process more efficient and reliable. We install construction sheets or other load-bearing constructions, control elements and switches, operating elements and panels, capacitors, electric drives, circuit boards, lighting elements and cooling and heating components. This provides you with a full functional guarantee for the entire assembly. Professional engineering coupled with our high-quality processes, functional simulations and testing will make the system technology aspect of your production process a sure thing.

- CONTROL TECHNOLOGY RIGHT DOWN TO THE CONTROL CABINET
- POWER DISTRIBUTION & PROTECTION
- FUNCTIONAL SIMULATIONS
- INTEGRATION OF ELECTROMECHANICAL COMPONENTS
- OPERATOR UNITS
- INTEGRATION OF ELECTRICAL DRIVES
- MANUFACTURING OF COMPLEX SYSTEM TECHNOLOGY

Our contribution to the success of your products: Quality.

Giving our all to make your products reliable

Our internal quality management system provides the basis for high-quality development and production. Our “zero-error strategy” begins with the incoming goods inspection and includes a full outgoing goods inspection, which features comprehensive electrical testing. By assigning highly qualified, trained employees and carrying out in-process control, we can ensure that each and every part involved in the process is flawless. In addition, a multitude of electrical test procedures are used – each of them tailored to meet your requirements.

- ISO 9001 AND IATF 16949 CERTIFICATIONS
- IN-PROCESS CONTROL
- INTERNAL QUALITY MANAGEMENT SYSTEM
- FULL INCOMING AND OUTGOING GOODS INSPECTIONS
- PROFESSIONAL LEAN MANAGEMENT WITH THE OBJECTIVE OF ACHIEVING CONTINUOUS IMPROVEMENT

The benefit to you: Our knowledge of your market.

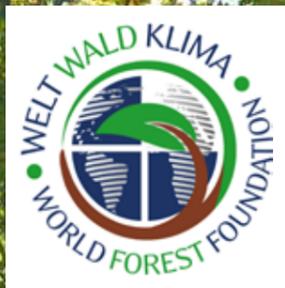

Markets differ greatly, our aspiration stays the same.

Every market has its own specific requirements, but one thing remains the same in every market: the demand for products that you can rely on. We are well versed in the specific requirements of your market. This saves a lot of valuable time during the development and production stages as our industry expertise is a key advantage in establishing efficient collaboration.

- STRENGTH IN DIVERSIFICATION
- UP TO 1,700 DIFFERENT PRODUCTS IN PRODUCTION EVERY WEEK
- SYNERGY THROUGH EXPERTISE IN OTHER INDUSTRIES
- CIS OFFERS SOLUTIONS
- WE GIVE OUR ALL TO ENSURE THAT YOUR PRODUCTS ARE RELIABLE

Always at the forefront of our minds: People and the environment.

We take our responsibility for tomorrow's world seriously.

At CiS, a healthy economy and healthy environment go hand in hand. With this in mind, we take our share of the responsibility for our future seriously and are particularly committed to preserving our environment. To this end, we operate in a CO₂-neutral manner by supporting international reforestation projects and make a point of using energy-efficient technology during our development, production and procurement processes. People and the environment have been at the heart of our corporate activities for many years.

- SUPPORTER OF THE "WORLD FOREST CLIMATE INITIATIVE" OF THE ECONOMIC SENATE E.V.
- CERTIFIED ENVIRONMENTAL MANAGEMENT SYSTEM IN ACCORDANCE WITH ISO 14001

connect with confidence.

Our code of ethics and conduct: Acting in the interests of clarity and truth.

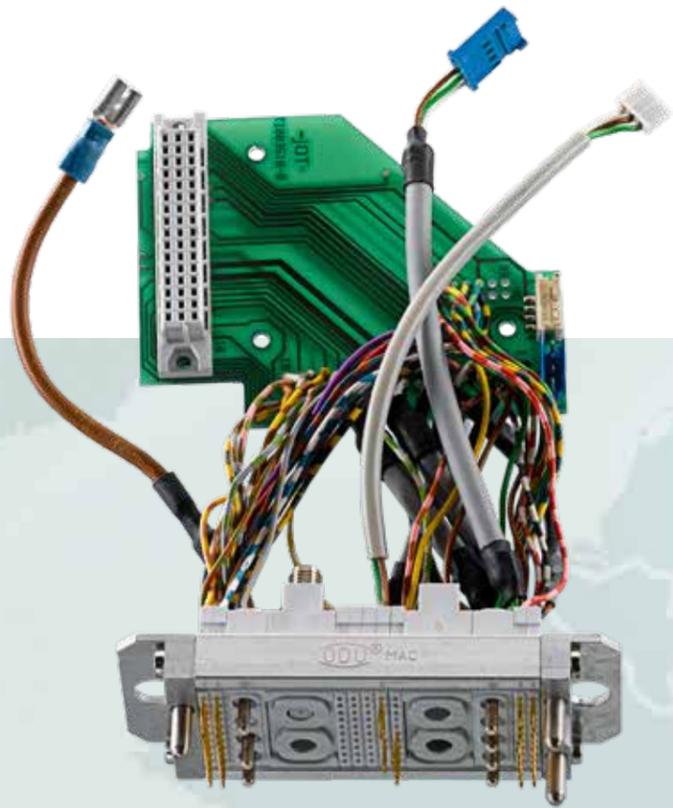

Cooperation is crucial.

Our corporate culture is characterised by a commitment to integrity. As a member of the UN Global Compact, the CiS Group has set up its own binding code of conduct that directs us in our actions and provides our partners with security. The clear distinction between private and commercial interests is anchored in this code of conduct to the same extent as the commitment to honesty, openness, trustworthiness and the pursuit of justice. Our code of conduct provides the basis for a working environment that is fair, safe, free from discrimination and that protects the well-being of employees; one in which "the collective counts". And, at the same time, our ethical manifesto represents an attitude towards employees, customers and partners that we try to live up to during our collective ventures.

- CERTIFICATION IN ACCORDANCE WITH BS OHSAS 18001
- SPONSOR OF "PLAN INTERNATIONAL", WHICH PROMOTES THE SCHOOLING OF CHILDREN IN THE 3RD WORLD
- RECOGNISED BY INTERTEK GROUP AS BEING ONE OF THE BEST EMPLOYERS (100/100 POINTS) IN THEIR WORKPLACE CONDITIONS ASSESSMENT AUDIT
- SUPPORTER OF NUMEROUS OTHER PROJECTS SUCH AS A PROJECT FOR BLIND PEOPLE RUN BY THE "ANDHERI HILFE" ORGANISATION
- SUPPORTER OF THE AID ORGANISATION "WIRTSCHAFT FÜR MENSCHEN" (BUSINESS FOR PEOPLE), WHICH FUNDS PROJECTS IN GERMANY AND AROUND THE WORLD
- TEAM EVENTS TO SUPPORT THE "ACTION MEDEOR" ORGANISATION

Cable assemblies from the heart of Europe.

Our corporate group: A commitment to providing German quality with a European approach.

CiS is headquartered in the area of Düsseldorf. The headquarter controls the fate of the CiS Group and this is where everything comes together. The customer's individual requirements and the cycle and speed of their processes represent the benchmark for our punctual deliveries. This is also ensured by the streamlined processes and the CiS Group's efficient organisational structure.
